Dear FDA:

I am concerned that my medications which I get from a compounding pharmacy in another state may no longer be available if proposed rules go into effect. I oppose the draft M.o. U. proposed by the FDA. Most of all I oppose the definition of "inordinate amount." By limiting the number of prescriptions that can be shipped across state lines from specialized compounding pharmacies, it infringes on my right to obtain the medications I need. This is an outrage. I urge you to do everything possible to oppose the M.o.U. and preserve my right to obtain the medications I need.

Sincerely and Respectfully,
